

Mixing Bowl and Mixing Spatula

Everall7 is pleased to present a very aesthetic, ergonomic set for mixing plasters, dental stones and alginate impression materials used in dental clinics and alginate masks used in beauty salons. The set includes: a warm gray bowl and a magenta spatula. It is possible to purchase individual pieces of each part of the set separately.

Mixing Bowl

The silicone bowl for mixing plasters, stones and alginate masses with a diameter of 4,72" (12 cm) is ergonomically shaped so that it is easy to hold in your hand when mixing plaster, dental stone or alginate mass. Thanks to the perfectly smooth inner surface of the bowl, the mixed material does not stick to the walls. The flexibility of the high-quality silicone from which the bowl is made makes it easy to clean after work.

Package: 1 pc

Mixing Spatula

Aesthetic, magenta-colored spatula for mixing plaster and making alginate masses, made of durable high-quality plastic. The smooth surface and shape of the mixing part are perfectly matched to the bowl, which increases the precision of work. The ergonomically shaped handle has a perfectly smooth surface that is comfortable for the user. The spatula is easy to clean and can be used in prosthetic laboratories, dental clinics as well as in beauty salons.

Package: 5 pcs
