

New colour of stone STODENT III sky blue

For over 30 years we have been helping dental technicians from all over the world in their daily work. Thanks to constant contact with professionals, we are aware of their needs and are constantly looking for solutions to improve everyday work in the prosthetic laboratory.

We present to you a new colour of the STODENT III brand - sky blue. Created in cooperation with European dental technicians, who informed us about a need for a less staining blue stone, without violet or red admixtures. We have produced 3rd class stone with a properly selected pigment of high purity, which allows to enjoy the colour of the summer sky, without leaving stains on tools or worktops.

The STODENT line is a wide range of products in many colours and scents. The variety of hardness types and pack sizes is ideally suited to all applications and various requirements in the dental laboratory. Compatibility with all types of impression materials, including polyether and hydrocolloids, properly selected parameters of hardness, expansion and fluidity of stone guarantee the highest work efficiency and quality of the final prosthetic restoration. Thanks to the development of optimal parameters of the product line, there is no need to increase the number of products in the prosthetic laboratory, which reduces costs and improves the comfort of everyday work.
